AQEEB H J

LEAD MOBILE ENGINEER • 12+ PRODUCTION APPS

Senior Android & Flutter Developer | Mobile Application Lead

Hassan & Bengaluru, Karnataka, India | +91 8073804900 | aqeeb.pasha.hnp@gmail.com
GitHub: github.com/aqeeb421 | LinkedIn: linkedin.com/in/aqeeb-pasha-94790a151 | Live Store Apps: 12+

EXECUTIVE SUMMARY

Results-driven Senior Mobile Application Developer & Technical Lead with 7+ years of experience architecting, building, and delivering 12+ production mobile applications across public governance, enterprise operations, telemedicine, and consumer marketplaces. Deep specialization in Native Android (Kotlin, Java, Android SDK) and Cross-Platform Flutter (Dart) ecosystems.

Proven track record owning complete mobile lifecycles: from requirement formulation, REST API integration, and hardware sensor pipelines (CameraX, Audio, GPS) to offline-first synchronization engines (Room DB + WorkManager), hardware-backed security (Android Keystore, RSA/AES-256, Root Detection), and Google Play Console release management. Certified in Cybersecurity & Ethical Hacking.

TECHNICAL SKILLS & INDUSTRY COMPETENCIES

Mobile Platforms: Native Android (Kotlin, Java), Android SDK, Flutter, Dart, XML Layouts, Material Design 3, Coroutines, Flow, StateFlow, LiveData

Architecture & Design: Clean Architecture, MVVM, MVI, Repository Pattern, Multi-Module Projects, Single Source of Truth, Dependency Injection

Offline-First & Data: Room Database, SQLite, WorkManager (Idempotent Sync, Constraints, Backoff), EncryptedSharedPreferences, Conflict Resolution

Security & Integrity: Android Keystore (RSA/AES-256-GCM), Root Detection (RootBeer), SSL Certificate Pinning, SafetyNet/Play Integrity, ProGuard/R8

Hardware & Media: CameraX API, Audio/Video Streaming Pipelines, Continuous Foreground Services, Location/GPS Geofencing, WhatsApp Cloud

Cloud, APIs & Tooling:RESTful APIs, Retrofit 2, OkHttp, JSON/Moshi, Firebase (FCM, Crashlytics, Auth), Google Play Console, App Store Connect, Git, Gradle DSL

PROFESSIONAL EXPERIENCE

Capulus Technology Pvt. Ltd.

May 2022 – Present | Hassan & Bengaluru, India

Android Application Developer Lead / Senior Mobile Application Developer

- **Lead Architecture & Lifecycle:** Spearheaded end-to-end mobile architecture and development across public safety, enterprise, and commercial ecosystems, delivering 12+ production applications.
- **Dual Native & Flutter:** Engineered high-concurrency native Android apps using Kotlin and Java, alongside cross-platform consumer apps using Flutter and Dart.
- **Offline-First Sync Engine:** Architected 100% offline-first local data storage using Room DB as the single source of truth, integrated with WorkManager for guaranteed background synchronization.
- **Enterprise Security:** Implemented hardware-backed Android Keystore cryptography (RSA/AES-256), secure credential handling, runtime root detection, and SSL certificate pinning.
- **Hardware & Media Pipeline:** Integrated complex hardware sensors including CameraX video/photo pipeline, continuous foreground services, and location/GPS geofencing.
- **Store Deployment & DevOps:** Managed Google Play Console and App Store release pipelines: configured ProGuard/R8 obfuscation, signed release bundles (.aab), and tracked crash analytics via Firebase Crashlytics.

Wizmindz

August 2019 – April 2022 | Karnataka, India

Junior Android Developer

- **Native Android UI:** Developed native Android applications using Java and Android SDK with modern Material Design principles.
- **Telecom & CRM:** Engineered Click-to-Call telecommunications applications and CRM management suites with automatic call logging and audio record handling.
- **API & Data Binding:** Implemented business workflows, dynamic RecyclerView layouts, and REST API data integration with Retrofit.
- **Performance & Debugging:** Conducted memory profiling, resolved regression bottlenecks, and supported production bug fixes and updates.

KEY PRODUCTION & FLAGSHIP PROJECTS (12+ APPS DELIVERED)

BharathFix Ecosystem (Home Services Platform)

Live on Play Store & Web

Tech Stack: Flutter, Dart, Provider, Google Play Store, REST APIs, Firebase

- Multi-app synchronized architecture spanning consumer Android app on Google Play, technician fulfillment app, governance admin dashboard, and web platform (bharathfix.netlify.app).
- Implemented real-time GPS technician tracking, automated job dispatching, end-to-end booking lifecycle, dynamic pricing engine, and payment gateway.

KSP PQRS — Karnataka State Police Citizen Safety App

Google Play Store Live: com.capulustech.ksppqrs

Tech Stack: Native Android, Java, Kotlin, Android SDK, Location Services, REST APIs

- Official citizen-facing public safety platform on Google Play Store with emergency SOS panic triggers, nearest police station geolocation, and digital e-Lost lost-property reporting.

- High-security REST API communication, automated status tracking, and citizen complaint lifecycle.

DoctorPlus & PatientApp (Telemedicine Suite) **Telemedicine Platform • GitHub**

Tech Stack: Native Android, Java, CameraX, Foreground Services, Audio/Video, REST

- Dual-sided telehealth mobile ecosystem connecting certified physicians with patients. Engineered real-time video/audio streaming via foreground services.
- Built electronic prescription generation, diagnostic record vault, and doctor consultation scheduling.

Fresh Chicken Hassan (Hyperlocal Commerce) **Production • Play Store & Netlify PWA**

Tech Stack: Flutter / PWA, Android App, WhatsApp Cloud Protocol, Netlify

- Farm-to-doorstep fresh ordering platform with 1-tap WhatsApp checkout and automated address formatting (fresh-chikens.netlify.app).
- Sub-90-minute delivery routing, QR code order verification, and responsive cross-platform layout.

KSP BWC — Evidence Collection Tool **Police Field Tool • High Security**

Tech Stack: Native Android, CameraX, Android Keystore, AES-256, Offline Sync, Root Detection

- Dedicated police-facing field tool for Body-Worn Camera (BWC) incident photo and video evidence capture.
- 100% offline-first local storage with vector conflict resolution and hardware-backed Android Keystore AES/RSA encryption.

KisanBharath EcoMart & VegBags Grocery **Agri-Commerce & Grocery Marketplace**

Tech Stack: Native Android, Kotlin, Room DB, Retrofit, MVVM Architecture

- Empowered rural producers and urban consumers with direct agricultural and grocery trade, inventory caching, and live order tracking.

EDUCATION, CERTIFICATION & LANGUAGES

Bachelor of Engineering (B.E.) — Computer Science & Engineering **2019**

Government Engineering College, Hassan | Affiliated to Visvesvaraya Technological University (VTU)

Professional Certification: Cybersecurity and Ethical Hacking

Languages: English (Professional Working), Kannada (Native / Fluent), Hindi (Working Proficiency)
